

Network connectivity: Basic information I

1. Combine the images with the most accurate descriptions.

Wi-Fi

wireless network connection

mobile data

wired network connection

cellular phone network

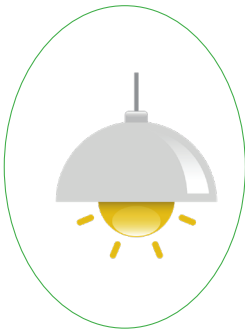

weak signal

strong signal

2. Which household items can use a Wi-Fi network. Circle them.

3. Think of some things together, that could require a Wi-Fi network. Write them down.

for example: a fridge, an oven, a robot vacuum cleaner, a robot lawn mower, a range hood, a dishwasher
